PRODUCER PRICE INDEXES--JANUARY 1986

The Producer Price Index for Finished Goods dropped 0.7 percent seasonally adjusted from December 1985 to January 1986, the Bureau of Labor Statistics of the U.S. Department of Labor reported today. The index had risen considerably in each month of the last quarter of 1985, following a period of virtually no net change from September 1984 through September 1985. Prices received by producers of intermediate goods also turned down in January, following three small monthly increases. Crude material prices fell 1.4 percent over the month, after decreasing by a smaller amount in December and climbing in each of the 3 months before that. (See table A.)

A dramatic downturn in prices for finished energy goods was responsible for most of the reversal in the Finished Goods Price Index in January. The consumer foods index also moved down, after substantial monthly advances at the end of 1985. Finished goods other than foods and energy eased down slightly, following an equally small rise in December.

Before seasonal adjustment, the Producer Price Index for Finished Goods moved down 0.3 percent in January to 296.2 (1967=100). Over the year from January 1985 to January 1986, the Finished Goods Price Index increased 1.4 percent. During the same span, consumer food prices rose 0.4 percent, the index for finished energy goods moved down 1.0 percent, consumer goods other than foods and energy climbed 2.4 percent, and capital equipment prices advanced 2.2 percent. The intermediate goods index declined 0.7 percent over the 12 months ended in January 1986, while crude material prices dropped 5.5 percent.

Table A. Percent changes from preceding month in selected stage-of-processing price indexes, seasonally adjusted

1/ Intermediate materials for food manufacturing and animal feeds.

* Figures shown above and elsewhere in this release may differ from those previously reported because seasonal adjustment factors have been recalculated to reflect developments during 1985. In addition, data for September 1985 have been revised to reflect the availability of late reports and corrections by respondents.

L 2.61/10:

Finished goods

Finished consumer goods. The Producer Price Index for finished consumer goods moved down 0.8 percent in January, after increasing 0.6 percent in December. The index for finished energy goods declined 4.2 percent, after increasing 2.2 percent a month earlier. Prices for both gasoline and home heating oil turned down sharply, following advances in previous months. In contrast, the natural gas index turned up after several months of decline, and prices for finished lubricants climbed more than in the preceding month.

Table B. Percent changes in finished goods price indexes, selected periods

Month	Changes from preceding month, seasonally adjusted						Change in finished goods from 12 months ago (unadj.)
	Finished goods	Capital equip-ment	Finished consumer goods	Finished consumer goods excluding foods			
				Total	Durables	Non-durables	
1985

* Figures shown above and elsewhere in this release may differ from those previously reported. See table A.

After rising 0.7 percent in December, the index for consumer foods moved down 0.4 percent. Prices fell more than in December for beef and veal, pork, and processed poultry. Prices turned down after rising a month earlier for fresh vegetables and eggs. In contrast, prices for roasted coffee soared 17.4 percent. Indexes for confectionery end products, fish, and shortening and cooking oils rose moderately.

The index for finished consumer goods other than foods and energy was unchanged in January, following a 0.2 percent increase in December. Advances were registered for drugs, tobacco products, cosmetics, and periodicals. In contrast, prices for passenger cars and light trucks were considerably lower, reflecting a renewal of manufacturer-subsidized financing. Apparel, household appliances, small arms and ammunition, and home electronic equipment also decreased.

Capital equipment. The Producer Price Index for capital equipment edged down 0.1 percent, after inching up 0.1 percent in December. Notable declines included light motor vehicles, truck trailers, chemical industry machinery, and pumps and compressors. Prices advanced, however, for heavy trucks, office machinery, machine tools, and construction machinery.

Intermediate goods

The Producer Price Index for Intermediate Materials, Supplies, and Components fell 0.4 percent from December to January after seasonal adjustment. The major cause of this decrease was the intermediate energy index, which moved down 3.2 percent. Very sharp price decreases occurred for gasoline, diesel fuel, residual fuel, and kerosene. In addition, prices declined for jet fuels and coke oven products. Liquefied petroleum gas prices continued to advance, but not nearly so much as in other recent months.

The steel mill products index fell 4.5 percent, in the wake of a fundamental shift in pricing strategy by the domestic steel industry. Many producers cut list prices for steel products sharply, to bring them into alignment with actual transaction prices. (Market transaction prices generally have not been made available from the steel industry for the PPI.) Among nonferrous metals, prices advanced for gold, silver, copper, and aluminum.

Following a year and a half of flat or declining prices, materials for nondurable manufacturing rose 0.4 percent. Substantial increases were noted for industrial chemicals, inedible fats and oils, paint materials, and synthetic rubber. On the other hand, fertilizer material prices fell sharply.

The construction materials and components index moved up 0.2 percent, as higher prices were registered for plastic plumbing products, wiring devices, and clay construction products. In contrast, prices declined for plywood and millwork.

Among miscellaneous intermediate goods, prices rose for pesticides and plastic parts, but moved down for electric motors and generators and mixed fertilizers. Within the intermediate foods and feeds category, increases for prepared animal feeds, refined sugar, and crude vegetable oils were offset by declines for meats, flour, and confectionery materials.

Crude goods

The Producer Price Index for Crude Materials for Further Processing fell 1.4 percent on a seasonally adjusted basis, following a decrease of 0.5 percent in December. The faster decline in the crude materials index was largely due to falling prices for various foodstuffs.

After moving down 0.5 percent in the preceding month, the index for crude foodstuffs and feedstuffs dropped 2.6 percent. Prices for turkeys plummeted a record 33.2 percent, following a modest advance in December. Cattle prices fell more than in the previous month. Prices for corn, fresh vegetables, and wheat turned down after rising in December. Raw cane sugar prices, in contrast, advanced substantially.

The index for crude energy materials rose 0.1 percent, after falling 0.5 percent in December. The natural gas index turned up after dropping for 7 consecutive months. Crude petroleum prices, however, declined following increases in each of the 4 preceding months.

The index for crude nonfood materials other than energy fell 0.3 percent, about the same as in December. Substantial declines were noted for leaf tobacco and logs and timber. Construction sand and gravel and aluminum base scrap also decreased. On the other hand, raw cotton prices showed a sizable advance, while moderate increases were registered for ferrous and copper base scrap, cattle hides, and wastepaper.

Net output price indexes for major industry groups

Price indexes for the net output of many major industry groups within the mining and manufacturing sectors, available for the first time in this release, moved up only slightly from December 1985 to January 1986. (See table 4 and the special announcement later in this release.) One of the few industry groups with a substantial increase in January was tobacco manufactures (up 3.8 percent). The 8.2 percent advance in this index from January 1985 to January 1986 was by far the largest 12-month rise for any major industry group. Prices for the net output of the printing and publishing industry group climbed 1.8 percent over the month and 4.8 percent over the year, ranking second to tobacco manufactures in both time frames. In contrast, prices received by domestic petroleum refiners for output sold to other industries fell 6.0 percent over the month. A few other major industry groups inched down in January.

Expansion of the Producer Price Index

Effective with this release of Producer Price Indexes, coverage of the industrial sector of the economy according to the methodology of the Producer Price Index Revision, a process that began in the late 1970's, has been virtually completed. Indexes for an additional 74 industries have now been calculated. This expansion includes several areas of the economy never before covered in the PPI, such as oil and gas well services, ordnance, communication equipment, and shipbuilding and repairing. It also improves coverage in such areas as textiles, nonmetallic minerals, metal ores, instruments, and aircraft. The PPI Revision program now covers 482 industries, which represent 98 percent of the total value of domestic mining and manufacturing production. A few manufacturing industries that account for the remaining 2 percent--computers, and guided missiles and space vehicles--present special problems and will be studied further. The industries being calculated for the first time this month are the following:

Standard Industrial Classification (SIC) Code	Industry
1031	Lead/zinc ores
1051	Bauxite and other aluminum ores
1061	Ferroalloy ores
1081	Metal mining services
1094	Uranium/radium/vanadium ores
1099	Metal ores, n.e.c.
1381	Oil/gas well drilling
1382	Oil/gas exploration services
1389	Oil/gas field services
1473	Fluorspar
2047	Dog, cat, and other pet food
2076	Vegetable oil mills, n.e.c.
2087	Flavoring extracts, syrups
2097	Manufactured ice
2099	Food preparations, n.e.c.
2259	Knitting mills, n.e.c.
2291	Felt goods, except woven felt and hats
2292	Lace goods
2293	Padding and upholstery filling
2294	Processed textile waste
2297	Nonwoven fabrics
2386	Leather and sheep lined clothing
2389	Apparel and accessories, n.e.c.
2393	Textile bags
2394	Canvas and related products
2395	Pleating and stitching
2399	Fabricated textile products
2429	Special product sawmills, n.e.c.

2449	Wood containers, n.e.c.
2517	Wood TV and radio cabinets
2519	Household furniture, n.e.c.
2599	Furniture and fixtures, n.e.c.
2655	Fiber cans, drums, and similar products
2661	Building paper and board mills
2771	Greeting card publishing
2789	Bookbinding and related work
2794	Electrotyping and stereotyping
2795	Lithographic platemaking services
3255	Clay refractories
3259	Structural clay products, n.e.c.
3264	Porcelain electrical supplies
3274	Lime
3292	Asbestos products
3293	Gaskets, packing, and sealing devices
3297	Nonclay refractories
3299	Nonmetallic mineral products, n.e.c.
3483	Ammunition, ex. small arms, n.e.c.
3489	Ordnance and accessories, n.e.c.
3629	Electrical industrial apparatus, n.e.c.
3661	Telephone and telegraph apparatus
3662	Radio and TV communications equipment
3671	Electron receiving tubes
3699	Electrical mach. equip. & supplies, n.e.c.
3721	Aircraft
3724	Aircraft engines and engine parts
3731	Shipbuilding and repairing
3795	Tanks and tank components
3811	Engineering/scientific equipment
3824	Fluid meters and counting devices
3832	Optical instruments and lenses
3911	Jewelry, precious metal
3942	Dolls
3949	Sporting and athletic goods
3951	Pens and mechanical pencils
3952	Lead pencils and art goods
3953	Marking devices
3955	Carbon paper and inked ribbons
3962	Feathers, plumes, and artificial flowers
3963	Buttons
3964	Needles, pins, and fasteners
3991	Brooms and brushes
3993	Signs and advertising displays
3996	Hard surface floor coverings
3999	Manufacturing industries, n.e.c.

A total of 168 new items has been added to the list of commodities included in the Producer Price Index. All commodity price indexes (except for agricultural products, scrap materials, electric power, and a few other scattered items) are now calculated using the revised PPI methodology. The total number of commodity indexes derived from the revised methodology currently stands at about 2,800. This number will change periodically in the future as industries already covered are resampled to ensure that the PPI remains representative and up-to-date. For further information on specific additions, deletions, and recodes of indexes that are occurring this month, please refer to tables 11 through 16 in the monthly detailed report Producer Price Indexes: Data for January 1986.

Also effective with this release, all remaining indexes for imports such as crude natural rubber, cocoa beans, and tin have been eliminated. Publication of the few remaining unit dollar prices has also been discontinued. The PPI is now strictly a system of price indexes measuring changes in prices received by domestic producers. BLS has a separate survey that provides price indexes covering all imported goods.

The Technical Note "Brief Explanation of Producer Price Indexes" has been rewritten to reflect the completion of the transition to the new methodology.

Price indexes for the net output of major mining and manufacturing industry groups

Beginning this month, price indexes for the net output of major industry groups are shown in this news release. Table 4 summarizes the data collected through the Producer Price Index Revision program, which has just been completed. This table is also being published as table 4 of the monthly detailed report Producer Price Indexes, where it had previously been published since the January 1985 issue as table 14.

Table 4 shows price indexes for 2-digit Standard Industrial Classification (SIC) major industry groups, as well as for the total mining sector and the total manufacturing sector. Comprehensive price coverage of the industrial portion of the U.S. economy according to the SIC classification system makes it much easier to compare PPI data with other economic time series arranged by the same system.

One principal distinguishing feature of the industry price indexes is that they are aggregated using net output weights. That is, only prices for those commodities shipped to establishments outside the sector in question are counted. In contrast, gross shipment weights are used for weighting traditional commodity grouping price indexes, which are calculated without regard to the origin or destination of commodities. The advantage of net-output-weighted price indexes is that they more accurately represent inter-industry price effects, that is, the inflationary impact one industry has on other industries that purchase its products.

Data users should be aware of the implications of net output weighting. For example, the index for the transportation equipment industry group (SIC 37) excludes that portion of the output of the motor vehicle parts and accessories industry (SIC 3714) sold to domestic original equipment manufacturers, which are also classified within SIC 37. Likewise, the total manufacturing sector price index includes only shipments of goods to final demand (e.g., consumers and exporters) and shipments to nonmanufacturing sectors (e.g., construction and agriculture). The considerable proportion of the total shipments from manufacturing industries that goes to other manufacturers (for example, semifinished goods, fuels, and supplies) is excluded from this index. For this reason, monthly percent changes for the total mining sector index and the total manufacturing sector index may not be consistent with the percent changes of their 2-digit components. That is, the additive consistency property of traditional commodity grouping indexes does not apply to the industry net output price indexes.

To avoid confusing the major industry group indexes shown in table 4 with the traditional major commodity group indexes shown in table 3, data users should pay special heed to the BLS index naming conventions and identifying index codes. Because of differences in coverage and aggregation methodology, indexes from the two tables that have similar titles may move somewhat differently.

The higher-level SIC price indexes will now be included in summary analyses of monthly price movements. Tracing inflationary and deflationary pressures in the economy using the net-output-weighted industry indexes will complement the traditional mode of analysis, which utilizes the commodity-based stage-of-processing concept.

Note on Seasonal Adjustment Procedures

Effective with this release, seasonal adjustment factors have been recalculated to reflect 1985 price movement patterns for stage-of-processing (SOP) and commodity groupings. This routine annual recalculation may affect seasonally adjusted indexes and percent changes from January 1981 to the present. Revised seasonally adjusted data for this period, as well as seasonal factors to be used through December 1986, are available on request from BLS. Table C shows 1985 monthly seasonally adjusted percent changes for the three major SOP categories calculated with the old seasonal factors, compared with the percent changes for recalculated indexes that incorporate the new seasonal factors.

Table C. Percent changes in major stage-of-processing indexes over the month, 1985, seasonally adjusted, using former and recalculated seasonal factors

Month	Finished goods		Intermediate materials, supplies, and components		Crude materials for further processing

Technical Notes

Brief Explanation of Producer Price Indexes

Producer price indexes (PPI) measure average changes in prices received by domestic producers of commodities in all stages of processing. Most of the information used in calculating the indexes is obtained through the systematic sampling of nearly every industry in the manufacturing and mining sectors of the economy. The PPI program also includes some information from other sectors—agriculture, fishing, forestry, services, and gas and electricity. Because producer price indexes are designed to measure only the change in prices received for the output of domestic industries, imports are not included. The sample currently contains about 3,200 commodities and 75,000 quotations per month.

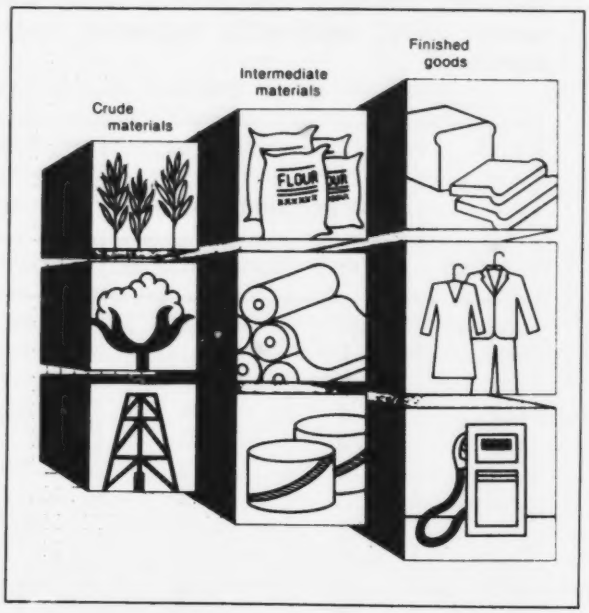
There are three primary systems of indexes within the PPI program: (1) Stage-of-processing indexes; (2) commodity indexes and; (3) indexes for the net output of industries and their products. The stage-of-processing structure (tables 1 and 2) organizes products by class of buyer and degree of processing. The commodity structure (tables 2 and 3) organizes products by similarity of end-use or material composition. The entire output of various industries is sampled to derive price indexes for the net output of industries and their products (table 4).

Within the stage-of-processing system, finished goods are commodities that will not undergo further processing and are ready for sale to the final demand user, either an individual consumer or a business firm. Consumer foods include unprocessed foods, such as eggs and fresh vegetables, as well as processed foods, such as bakery products and meats. Other finished consumer goods include durable goods, such as automobiles, household furniture, and appliances, and nondurable goods, such as apparel and home heating oil. Capital equipment includes producer durable goods such as heavy motor trucks, tractors, and machine tools.

The stage-of-processing category for intermediate materials, supplies, and components consists partly of commodities that have been processed but require further processing. Examples of such semifinished goods include flour, cotton yarn, steel mill products, and lumber. The intermediate goods category also encompasses items that are physically complete but that are purchased by business firms as inputs for their operations. Examples include diesel fuel, belts and belting, paper boxes, and fertilizers.

Crude materials for further processing are products entering the market for the first time that have not been manufactured or fabricated and that are not sold directly to consumers. Crude foodstuffs and feedstuffs include items such as grains and livestock. Examples of crude nonfood materials include raw cotton, crude petroleum, coal, hides and skins, and iron and steel scrap.

The illustration shows examples of how products are classified by stage of processing.



Producer price indexes for the net output of industries and their products are grouped according to the Standard Industrial Classification (SIC) and the Census product code extensions of the SIC. Industry price indexes are compatible with other economic time series organized by SIC codes, such as data on employment, wages, and productivity. Table 4 lists indexes for the net output of major mining and manufacturing industry groups at the 2-digit level.

Producer price indexes are based on selling prices reported by establishments of all sizes selected by probability sampling, with the probability of selection proportionate to size. Individual items and transaction terms from these firms are also chosen by probability proportionate to size. BLS strongly encourages cooperating companies to supply actual transaction prices at the time of shipment to minimize the use of list prices. Prices are nor-

mally reported monthly by mail questionnaire for the Tuesday of the week containing the 13th.

Price data are provided on a voluntary and confidential basis; no one but sworn BLS employees are allowed access to individual company price reports. All producer price indexes are routinely subject to revision once, 4 months after original publication, to reflect the availability of late reports and corrections by respondents.

Net output values of shipments are used as weights for industry indexes. Net output values refer to the value of shipments from establishments in one industry to establishments classified in another industry. However, weights for commodity price indexes are based on gross shipment values, including shipment values between establishments within the same industry. As a result, broad commodity grouping indexes such as the all commodities index are affected by the multiple counting of price change at successive stages of processing, which can lead to exaggerated or misleading signals about inflation. Stage-of-processing indexes partially correct this defect, but industry indexes consistently correct for this at all levels of aggregation. Therefore, industry and stage-of-processing indexes are more appropriate than broad commodity groupings for economic analysis of general price trends. Weights for most producer price indexes currently reflect values of shipments reported in the 1972 Census of Manufactures; these weights will be updated for 1982 Census of Manufactures data in 1987.

For further information on the underlying concepts and methodology of the Producer Price Index, see chapter 7, "Producer Prices," in *BLS Handbook of Methods* (1982), Bulletin 2134-1. Reprints are available from the Bureau of Labor Statistics on request (202-523-1221).

Calculating Index Changes

Movements of price indexes from one month to another are usually expressed as percent changes rather than as changes in index points because index point changes are affected by the level of the index in relation to its base period, while percent changes are not. The box shows the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods can be expressed as annual rates that are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the rate for a given 3- or 6- month span were maintained for a 12-month period.

Each index measures price changes from a reference period which equals 100.0 (1967 or some later month).

Index Point Change	
Finished Goods Price Index	288.5
less previous index	285.0
equals index point change	3.5

Index Percent Change	
Index point change	3.5
divided by the previous index	285.0
equals	0.012
results multiplied by 100	0.012 x 100
equals percent change	1.2

An increase of 188.5 percent from the reference period in the Finished Goods Price Index, for example, is shown as 288.5. This change can also be expressed in dollars as follows: "Prices received by domestic producers of a systematic sample of finished goods have risen from $100 in 1967 to $288.50 today." Likewise, a current index of 300.0 would indicate that prices received by producers of finished goods today are triple what they were in 1967.

Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

Seasonally adjusted data usually are preferred for analyzing general price trends in the economy because they eliminate the effect of changes that normally occur at about the same time and in about the same magnitude every year—such as price movements resulting from normal weather patterns, regular production and marketing cycles, model changeovers, seasonal discounts, and holidays. For these reasons, seasonally adjusted data more clearly reveal underlying cyclical trends.

Unadjusted data are of primary interest to users who need information which can be related to the actual dollar values of transactions. Individuals requiring this information include marketing specialists, purchasing agents, budget and cost analysts, contract specialists, and commodity traders. It is the unadjusted data that are generally cited in escalating long-term contracts such as purchase agreements or real estate leases. (See *Escalation and Producer Price Indexes: A Guide for Contracting Parties,* BLS Report 570, available on request from BLS.)

For more information, see "Appendix A: Seasonal Adjustment Methodology at BLS" in the *BLS Handbook of Methods* (1982), Bulletin 2134-1.

Table 1. Producer price indexes and percent changes by stage of processing

1/ Comprehensive relative importance figures are computed once each year in December.
2/ Data for Sept. 1985 have been revised to reflect the availability of late reports and corrections by respondents. All data are subject to revision 4 months after original publication.
3/ Not seasonally adjusted.
4/ Includes crude petroleum.
5/ Excludes crude petroleum.
6/ Percent of total finished goods.
7/ Percent of total intermediate materials.
8/ Formerly titled "Crude materials for further processing, excluding crude foodstuffs and foodstuffs, plant and animal fibers, oilseeds, and leaf tobacco."
9/ Percent of total crude materials.

Note: Seasonally adjusted data shown above may differ from those previously reported. See footnote for table A.

1/ Comprehensive relative importance figures are computed once each year in December. Data shown are expressed as a percent of total finished goods, total intermediate materials, or total crude materials. Data shown will not add up to 100.000 because not all commodity components of each stage-of-processing (SOP) index are shown; relative importance figures shown account for about 84 percent of total finished goods, about 81 percent of total intermediate materials, and about 95 percent of total crude materials. For each commodity component of the Finished Goods Index which is allocated to both capital equipment and finished consumer goods excluding foods, the relative importance figure shown reflects only the share allocated to the SOP grouping under which it is listed. For example, the relative importance figure shown for household furniture under the SOP grouping for finished consumer goods excluding foods includes the share allocated to that SOP grouping but not the share allocated to capital equipment.

2/ All data are subject to revision 4 months after original publication.

3/ Not seasonally adjusted.

4/ Not available.

Note: Seasonally adjusted data shown above may differ from those previously reported. See footnote for table A.

Table 3. Producer price indexes for selected commodity groupings

(1967 = 100 unless otherwise indicated)

Commodity code	Grouping	Unadjusted index 1/		
		Sept. 1985	Dec. 1985	Jan. 1986
	All Commodities	305.9	310.2	309.0

12-6	Other household durable goods	321.8	324.4	326.1
13-2	Concrete ingredients	337.0	335.9	337.6
14-1	Motor vehicles and equipment	254.8	272.0	270.7
15-1	Toys, sporting goods, small arms, etc	231.2	233.9	233.6
15-4	Photographic equipment and supplies	216.8	217.1	217.2
15-9	Other miscellaneous products	349.5	351.0	351.6

1/ Data for Sept. 1985 have been revised to reflect the availability of late reports and corrections by respondents. All data are subject to revision 4 months after original publication.

2/ Prices of some items in this grouping are lagged 1 month.

Table 84. Producer price indexes for the net output of major mining and manufacturing industry groups

Industry code	Industry 1/	Index base	Index			Unadjusted percent change to Jan. 1986 from:	
			Sep. 1985 2/	Dec. 1985 2/	Jan. 1986 2/	Jan. 1985	Dec. 1985
	Total mining industries	12/84	(3)	(3)	95.4	(3)	(3)
10	Metal mining	12/84	(3)	(3)	89.5	(3)	(3)
11	Anthracite mining	12/85	(3)	100.0	100.1	(3)	0.1
12	Bituminous coal and lignite mining	12/85	(3)	100.0	100.1	(3)	.1
13	Oil and gas extraction	12/85	(3)	100.0	(3)	(3)	(3)
14	Mining and quarrying of non-metallic minerals, except fuels	12/84	103.5	103.1	103.0	1.8	-.1
	Total manufacturing industries	12/84	(3)	(3)	101.2	(3)	(3)
20	Food and kindred products	12/84	97.3	99.3	99.5	-.6	.2
21	Tobacco manufactures	12/84	108.5	108.6	112.7	8.2	3.8
22	Textile mill products	12/84	99.6	99.5	99.5	-.5	0
23	Apparel and other finished products made from fabrics and similar materials	12/84	101.3	102.0	101.9	1.5	-.1
24	Lumber and wood products, except furniture	12/84	99.9	99.3	99.5	-.8	.2
25	Furniture and fixtures	12/84	102.5	102.8	103.1	2.7	.3
26	Paper and allied products	12/84	98.2	97.9	97.9	-2.1	0
27	Printing, publishing, and allied industries	12/84	104.0	104.9	106.8	4.8	1.8
28	Chemicals and allied products	12/84	101.5	100.5	101.0	.8	.5
29	Petroleum refining and related products	12/84	98.2	102.2	96.1	(3)	-6.0
30	Rubber and miscellaneous plastic products	12/84	99.7	99.6	100.4	0	.8
31	Leather and leather products	12/84	101.7	102.3	102.6	2.2	.3
32	Stone, clay, glass, and concrete products	12/84	102.7	103.0	103.3	3.0	.3
33	Primary metal industries	12/84	99.2	99.0	97.2	-2.5	-1.8
34	Fabricated metal products, except machinery and transportation equipment	12/84	100.6	101.1	101.1	.9	0
35	Machinery, except electrical	12/84	101.2	101.2	101.5	1.1	.3
36	Electrical and electronic machinery, equipment, and supplies	12/84	(3)	(3)	101.2	(3)	(3)
37	Transportation equipment	12/84	98.1	103.4	103.3	(3)	-.1
38	Measuring and controlling instruments; photographic, medical, and optical goods; watches and clocks	12/84	100.7	101.3	101.5	1.1	.2
39	Miscellaneous manufacturing industries	12/85	(3)	100.0	100.4	(3)	.4

1/ Indexes in this table are derived from the net-output-weighted industry price indexes. Because of differences in coverage and aggregation methodology, they will generally not match the movements of similarly-titled indexes which are derived from traditional commodity groupings.

2/ Data for Sep. 1985 have been revised to reflect the availability of late reports and corrections by respondents. All data are subject to revision four months after original publication. Data are not seasonally adjusted.

3/ Not available.

This news release from the Bureau of Labor Statistics of the U.S. Department of Labor provides summary data from the Producer Price Index. This more compact presentation is required because the Bureau no longer has enough printing funds to continue the former format. Full detail and a summary text appear in the monthly periodical Producer Price Indexes, available for $29 per year from the U.S. Government Printing Office, Washington, D.C. 20402. Some data may be obtained from the PPI Hotline, (202) 523-1765. For PPI definitions and methodology, see Chapter 7 of the BLS Handbook of Methods, Vol. 1, BLS Bulletin 2134-1, $8.50, also availaible from GPO.

L 2.61/10:

Table 1. Producer price indexes and percent changes by stage of processing

(1967 = 100)

Grouping	Relative importance Dec. 1985 1/	Unadjusted index Oct. 1985 2/	Unadjusted index Jan. 1986 2/	Unadjusted index Feb. 1986 2/	Unadjusted percent change to Feb. 1986 from: Feb. 1985	Unadjusted percent change to Feb. 1986 from: Jan. 1986	Seasonally adjusted percent change from: Nov. to Dec. 1/ Comprehensive relative importance figures are computed once each year in December.
2/ Data for Oct. 1985 have been revised to reflect the availability of late reports and corrections by respondents. All data are subject to revision 4 months after original publication.
3/ Not seasonally adjusted.
4/ Includes crude petroleum.
5/ Excludes crude petroleum.
6/ Percent of total finished goods.
7/ Percent of total intermediate materials.
8/ Formerly titled "Crude materials for further processing, excluding crude foodstuffs and feedstuffs, plant and animal fibers, oilseeds, and leaf tobacco."
9/ Percent of total crude materials.

NOTE: A number of indexes for September 1985 published in the January 1986 Producer Price Index news release have been corrected. The corrected index values appear in the January 1986 issue of the detailed report Producer Price Indexes. For further information and a list of the corrections, please contact BLS at (202) 272-5113.

Table 2. Producer price indexes and percent changes for selected commodity groupings by stage of processing
(1967 = 100 unless otherwise indicated)

Commodity code	Grouping	Relative importance	Unadjusted index		Unadjusted percent change to Feb. 1986 from:		Seasonally adjusted percent change from:

1/ Data for Oct. 1985 have been revised to reflect the availability of late reports and corrections by respondents. All data are subject to revision 4 months after original publication.

2/ Prices of some items in this grouping are lagged 1 month.

NOTE: A number of indexes for September 1985 published in the January 1986 Producer Price Index news release have been corrected. The corrected index values appear in the January 1986 issue of the detailed report Producer Price Indexes. For further information and a list of the corrections, please contact BLS at (202) 272-5113.

1/ Comprehensive relative importance figures are computed once each year in December.
2/ Data for Nov. 1985 have been revised to reflect the availability of late reports and corrections by respondents. All data are subject to revision 4 months after original publication.
3/ Not seasonally adjusted.
4/ Includes crude petroleum.
5/ Excludes crude petroleum.
6/ Percent of total finished goods.
7/ Percent of total intermediate materials.
8/ Formerly titled "Crude materials for further processing, excluding crude foodstuffs and feedstuffs, plant and animal fibers, oilseeds, and leaf tobacco."
9/ Percent of total crude materials.

This news release from the Bureau of Labor Statistics of the U.S. Department of Labor provides summary data from the Producer Price Index. This more compact presentation is required because the Bureau no longer has enough printing funds to continue the former format. Full detail and a summary text appear in the monthly periodical Producer Price Indexes, available for $29 per year from the U.S. Government Printing Office, Washington, D.C. 20402. Some data may be obtained from the PPI Hotline, (202) 523-1765. For PPI definitions and methodology, see Chapter 7 of the BLS Handbook of Methods, Vol. 1, BLS Bulletin 2134-1, $6.50, also available from GPO.

986/4

Table 1. Producer price indexes and percent changes by stage of processing
(1967 = 100)

Grouping	Relative importance Dec. 1985 1/	Unadjusted index Dec. 1985 2/	Mar. 1986 2/	Apr. 1986 2/	Unadjusted percent change to Apr. 1986 from: Apr. 1985	Mar. 1986	Seasonally adjusted percent change from: Jan. to Feb.	Feb. to Mar.	Mar. to Apr.
Finished goods	100.000	297.2	288.1	286.9	-2.1	-0.4	-1.6	-1.1	-0.6

Finished consumer goods less foods and energy	6/ 40.291	254.6	256.1	257.1	2.4	.4	-.1	.8	.2
Consumer nondurable goods less foods and energy	6/ 22.031	248.3	251.3	251.8	2.8	.2	-.3	1.0	-.3
Intermediate energy goods	7/ 15.710	536.2	437.4	414.9	-21.9	-5.1	-7.1	-9.4	-5.5
Intermediate materials less energy	7/ 84.290	303.5	303.2	302.8	-.5	-.1	-.4	.2	-.3
Intermediate materials less foods and energy	7/ 79.574	304.5	304.4	304.0	-.5	-.1	-.2	0	-.3
Crude energy materials 3/ 4/	9/ 31.601	735.6	618.4	570.7	-23.8	-7.7	-8.2	-8.9	-7.7
Crude materials less energy	9/ 68.399	233.0	224.0	221.8	-7.0	-1.0	-3.5	-.1	-2.0
Crude nonfood materials less energy 5/	9/ 15.869	242.9	245.6	249.1	-3.2	1.4	-3.0	2.6	1.2

1/ Comprehensive relative importance figures are computed once each year in December.
2/ Data for Dec. 1985 have been revised to reflect the availability of late reports and corrections by respondents. All data are subject to revision 4 months after original publication.
3/ Not seasonally adjusted.
4/ Includes crude petroleum.
5/ Excludes crude petroleum.
6/ Percent of total finished goods.
7/ Percent of total intermediate materials.
8/ Formerly titled "Crude materials for further processing, excluding crude foodstuffs and feedstuffs, plant and animal fibers, oilseeds, and leaf tobacco."
9/ Percent of total crude materials.

Permit No. G-59

This news release from the Bureau of Labor Statistics of the U.S. Department of Labor provides summary data from the Producer Price Index. This more compact presentation is required because the Bureau no longer has enough printing funds to continue the former format. Full detail and a summary text appear in the monthly periodical Producer Price Indexes, available for $29 per year from the U.S. Government Printing Office, Washington, D.C. 20402. Some data may be obtained from the PPI Hotline, (202) 523-1765. For PPI definitions and methodology, see Chapter 7 of the BLS Handbook of Methods, Vol. 1, BLS Bulletin 2134-1, $6.50, also available from GPO.

1/ Comprehensive relative importance figures are computed once each year in December.
2/ Data for Jan. 1986 have been revised to reflect the availability of late reports and corrections by respondents. All data are subject to revision 4 months after original publication.
3/ Not seasonally adjusted.
4/ Includes crude petroleum.
5/ Excludes crude petroleum.
6/ Percent of total finished goods.
7/ Percent of total intermediate materials.
8/ Formerly titled "Crude materials for further processing, excluding crude foodstuffs and feedstuffs, plant and animal fibers, oilseeds, and leaf tobacco."
9/ Percent of total crude materials.

PRODUCER PRICE INDEXES--MAY 1986

This news release from the Bureau of Labor Statistics of the U.S. Department of Labor provides summary data from the Producer Price Index for May 1986. This more compact presentation is required because the Bureau no longer has enough printing funds to continue the former format. Full detail and a summary text appear in the monthly periodical Producer Price Indexes, available for $29 per year from the U.S. Government Printing Office, Washington, D.C. 20402. Some data may be obtained from the PPI Hotline, (202) 523-1765. For PPI definitions and methodology, see Chapter 7 of the BLS Handbook of Methods, Vol. 1, BLS Bulletin 2134-1, $6.50, also available from GPO.

Summary Data from the Producer Price Index News Release June 1986

L 2.61/10:

This news release from the Bureau of Labor Statistics of the U.S. Department of Labor provides summary data from the Producer Price Index. This more compact presentation is required because the Bureau no longer has enough printing funds to continue the former format. Full detail and a summary text appear in the monthly periodical ***Producer Price Indexes***, available for $29 per year from the Superintendent of Documents, Washington, D.C. 20402. Some data may be obtained from the PPI Hotline, (202) 523-1765. For PPI definitions and methodology, see Chapter 7 of the ***BLS Handbook of Methods, Vol. 1***, BLS Bulletin 2134-1, $6.50, also available from the Superintendent of Documents.

1/ Comprehensive relative importance figures are computed once each year in December.
2/ Data for Feb. 1986 have been revised to reflect the availability of late reports and corrections by respondents. All data are subject to revision 4 months after original publication.
3/ Not seasonally adjusted.
4/ Includes crude petroleum.
5/ Excludes crude petroleum.
6/ Percent of total finished goods.
7/ Percent of total intermediate materials.
8/ Formerly titled "Crude materials for further processing, excluding crude foodstuffs and feedstuffs, plant and animal fibers, oilseeds, and leaf tobacco."
9/ Percent of total crude materials.

NOTE: Relative importance figures shown above have been revised to reflect final December 1985 indexes.
